NANOTECH INSULATION

Nansulate's clear, water-based, low-VOC coatings act as a thermal barrier to heat transfer and provide resistance to mold and moisture. Users typically report energy savings of 20 percent to 40 percent.

GET IT CLOSE. HIT YOUR MARK. LOCK IT DOWN. DRILL.

THE NEW HMD904S SWIVEL BASE DRILL.

It's tough to line up precise center points especially in horizontal or upside down positions with a magnetic drill. But not with our new swivel base model. Get it close and engage the magnet. Release the swivel's quick unlock handle. Line up the pilot over the center point and lock the swivel. It's that simple and only takes seconds. Hougen makes the tough holes easy, again.
